<b>Office Action Summary</b>	<b>Application No.</b> 10/534,734	<b>Applicant(s)</b> MATSUMOTO ET AL.	
	<b>Examiner</b> MELISSA S. MERCIER	<b>Art Unit</b> 1615	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 6-8 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 12, 2009.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

Receipt of the Information Disclosure Statement filed on June 6, 2005 is acknowledged. A signed copy is attached to this office action.

### ***Claim Objections***

Claim 5 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 1. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). The only difference between the two claims is the recitation of a composition versus a food, however, claim 5 does not further limit said preamble with any kind of structural limitation, therefore, the recitation of a food is

Art Unit: 1615

regarded as future intended use in the same way that the recitation of "a muscle building preparation for use during rehabilitation after injury or post injury surgery." is regarded. The recitation of future intended use is not given patentable weight in a composition of matter claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 rejected under 35 U.S.C. 102(b) as being anticipated by Takaiohi et al. (WO91/15127), abstract of record.

Takaiohi discloses a high protein, high viscosity alimentary food comprising on a dry weight basis 40-65% protein, 5-25% fat, and 15-40% carbohydrates (abstract). The recitation of wherein the injury is a fracture, joint injury, pulled muscle, or sprain is regarded as future intended use of the composition and therefore not given patentable weight. However, since the same composition is disclosed by Takaiohi, it would inherently also possess the same functional limitations.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimizu et al. (WO97/43912), abstract of record.

Shimizu discloses a food composition comprising 10-65% protein, 5-25% fat, and 15-70% carbohydrates, on a dry weight basis (abstract). The recitation of wherein the injury is a fracture, joint injury, pulled muscle, or sprain is regarded as future intended use of the composition and therefore not given patentable weight. However, since the same composition is disclosed by Shimizu, it would inherently also possess the same functional limitations.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Emota et al. (WO99/34690) abstract, of record.

Emota discloses a gelled food composition comprising on a dry matter basis, 30-90% saccharides (carbohydrates), 5-40% lipids (fat), and 2-60% protein (abstract). The recitation of wherein the injury is a fracture, joint injury, pulled muscle, or sprain is regarded as future intended use of the composition and therefore not given patentable weight. However, since the same composition is disclosed by Emota, it would inherently also possess the same functional limitations.
